```java
import java.io.File;
import java.io.FileNotFoundException;
import java.util.Scanner;

public class FileReadProgram {
    public static void main(String[] args) {
        Scanner scanner = new Scanner(System.in);

        System.out.print("Enter the file path: ");
        String filePath = scanner.nextLine();

        try {
            File file = new File(filePath);
            Scanner fileScanner = new Scanner(file);

            System.out.println("File contents:");
            while (fileScanner.hasNextLine()) {
                System.out.println(fileScanner.nextLine());
            }

            fileScanner.close();
        } catch (FileNotFoundException e) {
            System.out.println("Error: File not found. Please make sure the file path is correct.");
        }
    }
}
```
